 Syntax assistant

3. Extract the Java and ODBC/CLI drivers by running the following command from the dsdriver directory:

```
./installDSDriver
```

The installDSDriver command creates the db2profile and db2cshrc script

Connection configuration resources

Host name: b1bc1829-6f45-4cd4-bef4-10cf081900bf.c1ogj3sd0gtu0lqde00.databases.apdomain.cloud

With SSL: Yes

Port number: 32304

Database name: bludb

User ID: <user name>

Password: *****

Version: Compatible with Db2, Version 11.5.0 or later

[Download SSL Certificate](#)

JDBC string

```
jdbc:db2://b1bc1829-6f45-4cd4-bef4-10cf081900bf.c1ogj3sd0gtu0lqde00.databases.apdomain.cloud:32304/bludb:user=<user name>;password=<your_password>;sslConnection=true;
```
