

Upload Image To IBM Container

| | |
|--------------|---------------------------------------|
| Team ID | PNT2022TMID35342 |
| Project Name | Containment Zone Alerting application |

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```
